## About the role

We are a seeking a Security Engineer with experience.

As a Security Engineer, you will be responsible for completing thorough risk assessments, identifying vulnerabilities within physical networks, Cloud infrastructure (Azure) and public APIs, and creating security perimeters, or configuring systems to enhance existing security features.

To succeed in this role, you will have a passion for innovative technology, including APIs, microservices and Cloud services.  You will also need to be very pro-active and love solving problems.

## Responsibilities & duties:

1.  Provide technical expertise in the selection, implementation, operation, and maintenance of security tools and countermeasures for the protection of computer systems, networks, and information.

2.  You will ensure the confidentiality and integrity of our corporate and customer data. Provide technical leadership by identifying weaknesses in capabilities as well as generating gap analysis/road maps.

3.  Complete, deliver, and maintain compliance documentation for internal and external users. Assist in completing customer and 3rd party questionnaires for contractual or audit/compliance purposes.

4.  Prepare and document security policies and procedures. Enhance internal policies, testing, etc. to ensure compliance with SOC2 controls.

5. You will be responsible for writing comprehensive reports including assessment-based findings, outcomes, and propositions for further system security enhancement when required.

6. Responsible for using and managing vulnerability Scanners such as OWASP tools, Tenable, Acunetix, Burp Suite, etc.

7. Configure and manage the Security Information & Event Management (SIEM) tools.

8. You will work with 3rd party Pen-Testers and consultants to maintain compliance across our product portfolio.

9. Other IT responsibilities as required.

## What you need for this role
- Be fully bilingual (English & Spanish), or native English speaker
- CISSP Certification
- CEH
- GIAC
- GSEC
- Microsoft Azure
- Microsoft M365 & O365
- SIEM
- IPS
- HIDS
